DETAILED ACTION

Election/Restrictions

- 1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-13, 15, 17-27 drawn to a method for the detection of microbes or toxins, classified in class 435, subclass 34.
- II. Claims 14 and 16, drawn to an apparatus, classified in class 435, subclass 283.1. The inventions are distinct, each from the other because of the following reasons:
- 2. The methods of Invention I and the apparatus of Invention II are related as processes and apparatus for their practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process.

 (MPEP § 806.05(e)). In this case, the apparatus can be used to detect for viable microbes, nonviable microbes or microbial toxins, as claimed. The apparatus is also useful for detecting non-intrinsic fluorophores in microbes or the apparatus is useful for other assays such as protein assays or nucleic acid assays (e.g. to visualize DNA on an agarose gel).
- 3. Because these inventions are distinct for the reasons given above and
 - a. have acquired a separate status in the art as shown by their different sub-classification;
 - b. have different and separately burdensome: manual and/or computer: name, subject and bibliographical searches; and
 - c. have divergent subject matter, restriction for examination purposes as indicated is proper.

Art Unit: 1651

Species Election Requirement

4. This application contains claims directed to the following patentably distinct species of the claimed invention if Group I is elected:

- A. Species of the target detected in the claimed method:
 - 1) viable microbes.
 - 2) non-viable microbes, or
 - 3) toxins.
- B. Species of fluorophores, i.e. a specific excitable/detectable fluorophore.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the

Application Control Number: 10 054,419

Art Unit: 1651

examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Lynda T Guo whose telephone number is (703) 605-1200. The examiner can normally be reached on Tue - Fri and alternate Mondays (9:00am - 7:00pm).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Michael G Wityshyn can be reached on (703) 308-4743. The fax phone numbers for the organization where this application or proceeding is assigned are (703) 305-3014 for regular communications and (703) 872-9307 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703-308-1235.
